

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

1 Legal status and principal activities

Oman Oil Marketing Company SAOG (the "Company" or "Parent Company") is registered in the Sultanate of Oman as a public joint stock company and is primarily engaged in the marketing and distribution of petroleum products. The Company has its primary listing on the Muscat Securities Market (MSM), Sultanate of Oman.

The accounts of the Company are consolidated in the financial statements of Oman Oil Company SAOC (the ultimate parent company), a closed joint stock company registered in the Sultanate of Oman. The Company has entered into a 'Trademark License Agreement' with the ultimate parent company dated 22 September 2003, for the right to use the trademark 'Oman Oil', in exchange for an annual fee of 0.09% of all fuel sales.

These consolidated financial statements comprise the Parent Company and its subsidiaries (together referred to as the "Group"), the details of which are set out in Note 3 to the consolidated financial statements. The separate financial statements represent the financial statements of the Parent Company on a standalone basis. The consolidated and separate financial statements are collectively referred to as 'the financial statements'.

2 Application of new and revised International Financial Reporting Standards (IFRS)

2.1 New and amended IFRSs and standard that are effective for the current year

The following new and revised IFRSs, which became effective for annual periods beginning on or after 1 January 2019, have been adopted in these financial statements. The adoption of the following IFRSs have not had any material impact on the disclosures or on the amounts reported in these consolidated financial statements and are listed below.

- *Amendments to IFRS 9 Prepayment Features with Negative Compensation and Modification of financial*
- *Amendments to IAS 28 Investment in Associates and Joint Ventures*
- *Annual Improvements to IFRSs 2015-2017 Cycle Amendments to IFRS 3 Business Combinations, IFRS 11*
- *Amendments to IAS 19 Employee Benefits Plan Amendment, Curtailment or Settlement*
- *IFRIC 23 Uncertainty over Income Tax Treatments*

The Group also applies, for the first time, IFRS 16 Lease and the related consequential amendments to other IFRS Standards that are effective for annual period that begins on or after 1 January 2019. IFRS 16 introduces new or amended requirements with respect to lease accounting. It introduces significant changes to lessee accounting by removing the distinction between operating and finance lease and requiring the recognition of a right-of-use asset and a lease liability at commencement for all leases, except for short-term leases and leases of low value assets when such recognition exemptions are adopted. In contrast to lessee accounting, the requirements for lessor accounting have remained largely unchanged.

The impact of the adoption of IFRS 16 on the Group's consolidated financial statements is described below.

(a) Impact of the new definition of a lease

The Group has made use of the practical expedient available on transition to IFRS 16 not to reassess whether a contract is or contains a lease. Accordingly, the definition of a lease in accordance with IAS 17 will continue to be applied to those leases entered or changed before 1 January 2019.

The change in definition of a lease mainly relates to the concept of control. IFRS 16 determines whether a contract contains a lease on the basis of whether the customer has the right to control the use of an identified asset for a period of time in exchange for consideration. This is in contrast to the focus on 'risks and rewards' in IAS 17.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

2 Application of new and revised International Financial Reporting Standards (IFRS) (continued)

2.1 New and amended IFRSs and standard that are effective for the current year (continued)

(a) Impact of the new definition of a lease (continued)

The Group applies the definition of a lease and related guidance set out in IFRS 16 to all lease contracts entered into or changed on or after 1 January 2019 (whether it is a lessor or a lessee in the lease contract). In preparation for the first-time application of IFRS 16, the Group has carried out an implementation assessment. Assessment has shown that the new definition in IFRS 16 will not significantly change the scope of contracts that meet the definition of a lease for the Group.

(b) Impact on Lessee Accounting

(i) Former operating leases

IFRS 16 changes how the Group accounts for leases previously classified as operating leases under IAS 17, which were off balance sheet.

Applying IFRS 16, for all leases (except as noted below), the Group:

- Recognises right-of-use assets and lease liabilities in the statement of financial position, initially measured at the present value of the future lease payments, with the right-of-use asset adjusted by the amount of any prepaid or accrued lease payments in accordance with IFRS 16:C8(b)(ii);
- Recognises depreciation of right-of-use assets and interest on lease liabilities in the statement of profit or loss;
- Separates the total amount of cash paid into a principal portion (presented within financing activities) and interest (presented within financing activities) in the statement of cash flows.

Lease incentives (e.g. rent free period) are recognised as part of the measurement of the right-of-use assets and lease liabilities whereas under IAS 17 they resulted in the recognition of a lease incentive, amortised as a reduction of rental expenses on a straight line basis.

Under IFRS 16, right-of-use assets are tested for impairment in accordance with IAS 36.

For short-term leases (lease term of 12 months or less) and leases of low-value assets (which includes tablets and personal computers, small items of office furniture and telephones), the Group has opted to recognise a lease expense on a straight-line basis as permitted by IFRS 16. This expense is presented within 'other expenses' in profit or loss.

The Group has used the following practical expedients when applying the modified retrospective approach to leases previously classified as operating lease applying IAS 17.

- The Group has elected not to recognise right-of-use assets and lease liabilities to leases for which the lease term ends within 12 months of the date of initial application.
- The Group has used hindsight when determining the lease term when the contract contains options to extend or terminate the lease.

The Group has opted for the modified retrospective application permitted by IFRS 16 upon adoption of the new standard. During the first time application of IFRS 16 to operating leases, the right to use the leased assets was generally measured at the amount of lease liability, using the incremental borrowing interest rate at the time of first time application. IFRS 16 transition disclosures also requires the Group to present the reconciliation.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

2 Application of new and revised International Financial Reporting Standards (IFRS) (continued)

2.1 New and amended IFRSs and standard that are effective for the current year (continued)

(c) Impact on Lessor Accounting

IFRS 16 does not change substantially how a lessor accounts for leases. Under IFRS 16, a lessor continues to classify leases as either finance leases or operating leases and account for those two types of leases differently.

However, IFRS 16 has changed and expanded the disclosures required, in particular regarding how a lessor manages the risks arising from its residual interest in leased assets. Under IFRS 16, an intermediate lessor accounts for the head lease and the sublease as two separate contracts. The intermediate lessor is required to classify the sublease as a finance or operating lease by reference to the right-of-use asset arising from the head lease (and not by reference to the underlying asset as was the case under IAS 17).

2.2 New and revised IFRS in issue but not yet effective

The Group has not yet applied the following new and revised IFRSs that have been issued but are not yet effective:

New and revised IFRSs	Effective for annual periods beginning on or after
Amendments to References to the Conceptual Framework in IFRS Standards - amendments to IFRS 2, IFRS 3, IFRS 6, IFRS 14, IAS 1, IAS 8, IAS 34, IAS 37, IAS 38, IFRIC 12, IFRIC 19, IFRIC 20, IFRIC 22, and SIC-32 to update those pronouncements with regard to references to and quotes from the framework or to indicate where they refer to a different version of the Conceptual Framework.	01 January 2020
Amendment to IFRS 3 <i>Business Combinations</i> relating to definition of a business.	01 January 2020
IFRS 17 <i>Insurance Contracts</i> IFRS 17 requires insurance liabilities to be measured at a current fulfilment value and provides a more uniform measurement and presentation approach for all insurance contracts. These requirements are designed to achieve the goal of a consistent, principle-based accounting for insurance contracts. IFRS 17 supersedes IFRS 4 Insurance Contracts as of 1 January 2021.	01 January 2021
Amendments to IFRS 10 Financial Statements and IAS 28 <i>Investments in Associates and Joint Ventures</i> (2011) relating to the treatment of the sale or contribution of assets from an investor to its associate or joint venture.	Effective date deferred indefinitely. Adoption is still

Management anticipates that these new standards, interpretations and amendments will be adopted in the consolidated financial statements as and when they are applicable and adoption of these new standards, interpretations and amendments, may have no material impact on the consolidated financial statements of the Group in the year of initial application.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies

The principal accounting policies are summarised below. These policies have been consistently applied to all the years presented, unless otherwise stated.

3.1 Basis of preparation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as issued by International Accounting Standards Board (IASB), the interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) of the IASB and the Commercial Companies Law of the Sultanate of Oman.

The new Commercial Companies Law promulgated by the Royal Decree No. 18/2019 (the Commercial Companies Law of the Sultanate of Oman) was issued on 13 February 2019 which has replaced the Commercial Companies Law. As per the articles of the Royal Decree No. 18/2019, the new Commercial Companies Law has come into force on 17 April 2019 and the companies should comply with the new law within 1 year from 17 April 2019.

The consolidated financial statements are prepared under the historical cost convention. The consolidated financial statements have been presented in Rial Omani ("RO") which is also the functional currency of the Group.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

The preparation of consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates. In the process of applying the Group's accounting policies, management has used its judgments and made estimates in determining the amounts recognised in the financial statements. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements as disclosed in Note 4 to the consolidated financial statements.

3.2 Basis of consolidation

The consolidated financial statements comprise the financial statements of the Parent and its subsidiaries as at 30 September 2020.

Subsidiary companies	Shareholding percentage		Country of incorporation	Principal activities
	2020	2019		
Oman Oil Marketing Company LLC	100%	100%	KSA	Marketing and distribution of petroleum products
Alhalin International LLC	100%	100%	Oman	Retail convenience stores and related operations
Sultanate Energy Company Limited	100%	100%	United republic of Tanzania	Marketing and distribution of petroleum products
Duqm Bunker Terminal LLC	100%	-	Oman	Marketing and distribution of petroleum products

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.2 Basis of consolidation (continued)

Subsidiaries

The financial statements comprise those of the Parent Company and each of its subsidiaries as at 30 September 2020. Subsidiaries are all entities (including special purpose entities) over which the Group exercises control. Control is achieved when the Parent Company:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee.
- Rights arising from other contractual arrangements.
- The Group's voting rights and potential voting rights.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the statement of comprehensive income from the date the Group gains control until the date the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the equity holders of the Parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- derecognises the assets (including goodwill) and liabilities of the subsidiary
- derecognises the carrying amount of any non-controlling interests
- derecognises the cumulative translation differences recorded in equity
- recognises the fair value of the consideration received
- recognises the fair value of any investment retained
- recognises any surplus or deficit in profit or loss
- reclassifies the Parent's share of components previously recognised in other comprehensive income to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

The Parent Company accounts for its investment in subsidiaries based on the equity method for the purpose of its separate financial statements.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.3 Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. Where an item of property, plant and equipment comprises major components having different useful lives, they are accounted as separate items of property, plant and equipment.

Expenditure incurred to replace a component of an item of property, plant and equipment that is accounted for separately, including major inspection and overhaul expenditure, is capitalised and amortised. Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the item of property, plant and equipment and can be measured reliably. All other expenditure is recognised in the statement of comprehensive income as an expense when incurred.

The cost of the property, plant and equipment is written down to residual value in equal instalments over the estimated useful lives of the assets. The estimated useful lives are:

	Years
Buildings	10 to 20
Plant and equipment	5 to 25
Vehicle, furniture and computers	4 to 8

Capital work-in-progress are carried at cost less any recognised impairment loss and is not depreciated until it is transferred into one of the asset categories, which occurs when the asset is ready for use.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposals of property, plant and equipment are determined by comparing the proceeds with the carrying amounts and are taken into account in determining operating profit.

3.4 Investment in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control. The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries.

The Group's investments in its associate and joint venture are accounted for using the equity method.

Under the equity method, the investment in an associate or a joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate or joint venture since the acquisition date. Goodwill relating to the associate or joint venture is included in the carrying amount of the investment and is not tested for impairment separately.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.4 Investment in associates and joint ventures (continued)

The statement of comprehensive profit or loss reflects the Group's share of the results of operations of the associate or joint venture. Any change in other comprehensive income of those investees is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognised directly in the equity of the associate or joint venture, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

The aggregate of the Group's share of profit or loss of an associate and a joint venture is shown in the consolidated statement of profit or loss outside operating profit.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, and then recognises the loss in the consolidated statement of profit or loss.

Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

3.5 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs are those expenses incurred in bringing each product to its present location and condition, and are determined as follows:

- Oil and lubricants : purchase cost on a first-in-first-out basis

Net realisable value is based on estimated selling price, less any further costs expected to be incurred to completion and disposal.

3.6 Impairment of non-financial assets

The carrying amount of the Group non-financial assets other than inventories are reviewed at each reporting date to determine whether there is any indication of impairment. In any such indications exist, the assets recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset or cash generating unit exceeds its recoverable amount. The recoverable amount of an asset is the greater of its fair value less cost to sell and value in use. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.6 Impairment of non-financial assets (continued)

Impairment losses are recognised in the statement of comprehensive income. Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exist. An impairment loss is reversed (other than relating to goodwill) if there has been a change in estimated used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

3.7 Financial assets

Initial recognition and measurement

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level. The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon
- Financial assets at fair value through profit or loss

Financial assets at amortised cost (debt instruments)

This category is the most relevant to the Group. The Group measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest rate method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired. The Group's financial assets at amortised cost includes trade receivables and cash and cash equivalents.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.7 Financial assets (continued)

Impairment of financial assets

The adoption of IFRS 9 has fundamentally changed the Group's accounting for impairment losses for financial assets by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. IFRS 9 requires the Group to record an allowance for ECLs for all debt financial assets not held at FVTPL. The Group has applied the standard's simplified approach and has calculated ECLs based on lifetime expected credit losses. The Group has established a provision matrix that is based on the Group's historical credit loss experience as adjusted for forward-looking factors.

ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive. The shortfall is then discounted at an approximation to the asset's original effective interest rate.

The Group considers a financial asset in default when contractual payment is 180 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

3.8 Cash and cash equivalents

For the purpose of statement of cash flow, cash and cash equivalents include cash on hand and at bank with a maturity of less than 3 months from the date of placement, net of bank overdrafts, if any.

3.9 Borrowings

All loans and borrowings are initially recognised at cost less directly attributable transaction costs.

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method. Instalments due within one year at amortised cost are shown as a current liability. Gains and losses are recognised in the statement of comprehensive income when the liabilities are derecognised as well as through the amortisation process. Interest costs are recognised as an expense when incurred except those that qualify for capitalisation.

3.10 Provisions

Provisions are recognised by the Group when there is a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

3.11 Trade creditors and other payables

Liabilities are recognised for amounts to be paid in the future for goods and services received, whether or not billed to the Group.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.12 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

3.13 Dividend distribution

The Board of directors adopts a prudent dividend policy, which complies with regulatory requirements applicable in the Sultanate of Oman. Dividends are distributed in accordance with the Parent Group's Memorandum of Association and are subject to the approval of shareholders. Dividend distribution to the Parent Group's shareholders is recognised as a liability in the Parent Group's separate financial statements only in the period in which the dividends are approved by the Parent Group's shareholders.

3.14 Segment reporting

An operating segment is a component of an entity that engages in business activities from which it may earn revenues and incur expenses including revenues and expenses relating to transactions with other components of the same entity, whose operating results are regularly reviewed by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and for which discrete financial information is available. The accounting policies of the reportable segments are the same as the Group's accounting policies described under note 3.

3.15 Revenue recognition

Revenue from contracts with customers

The Group's principal activity is selling fuel, lubricants and petroleum products.

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has generally concluded that it is the principal in its revenue arrangements because it typically controls the goods or services before transferring them to the customer.

Sale of fuel, lubricants and petroleum products

Revenue from sale of fuel, lubricants and petroleum products is recognised at the point in time when control of the asset is transferred to the customer, generally on delivery of the products. The normal credit terms are 30 to 90 days upon delivery/receipt.

Volume rebate

The Group provides retrospective volume rebates to certain customers once the quantity of products purchased during the period exceeds a threshold specified in the contract. Rebates are offset against amounts payable by the customer. To estimate the variable consideration for the future expected rebates, the group applies the most likely amount method for contracts with a single-volume threshold and the expected value method for contracts with more than one volume threshold. The selected method that best predicts the amount of variable consideration is primarily driven by the number of volume thresholds contained in the contract. The Group then applies the requirements on constraining estimated of variable consideration and recognises a refund liability for the expected future rebates.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.15 Revenue recognition (continued)

Loyalty points programme

The Group has a loyalty programme, Basma, which allows customers to accumulate points that can be redeemed for free products. The loyalty points give rise to a separate performance obligation as they provide a material right to the customer. A portion of the transaction price is allocated to the loyalty points awarded to customers based on relative stand-alone selling price and recognised as a contract liability until the points are redeemed. Revenue is recognised upon redemption of products by the customer.

When estimating the stand alone selling price of the loyalty points, the Group considers the likelihood that the customer will redeem the points. The Group updates its estimate of the points that will be redeemed on a quarterly basis and any adjustments to that contract liability balance are charged against revenue.

Contract balances

Contract assets

A contract asset is the right to consideration in exchange for goods or services transferred to the customer. If the Group performs by transferring goods or services to a customer before the customer pays consideration or before payment is due, a contract asset is recognised for the earned consideration that is conditional.

Contract liabilities

A contract liability is the obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Group performs under the contract.

3.16 Director's remuneration

The Directors' remuneration is governed and calculated as set out in the Commercial Companies Law of 2019 and the regulations issued by the Capital Market Authority of Oman.

3.17 End-of-service benefits

End-of-service benefits are accrued in accordance with the terms of employment of the Group's employees at the reporting date, having regard to the requirements of the Oman Labour Law and its amendments. Employee entitlements to annual leave and leave passage are recognised when they accrue to employees and an accrual is made for the estimated liability arising as a result of services rendered by employees up to the reporting date. These accruals are included in current liabilities, while that relating to end-of-service benefits is disclosed as a non-current liability.

Contributions to a defined contribution retirement plan and occupational hazard insurance for Omani employees in accordance with the Omani Social Insurances Law of 1991, are recognised as an expense in the statement of comprehensive income as incurred.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.18 Foreign currency

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the transaction date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at reporting date exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

3.19 Borrowing cost

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

3.20 Finance income

Finance income comprises interest received or receivable on funds invested. Finance income is recognised in the statement of profit or loss using the effective interest rate method.

3.21 Leases

After adoption of IFRS 16 – applicable from 1 January 2019

Right-of-use assets

The Group has implemented IFRS 16 effective 1 January 2019 and therefore the Group has recognised a right-of-use assets and lease liability in the consolidated financial information.

The Group recognises a right of use asset and a lease liability at the lease commencement date. The right-of-use of asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located.

The right-of-use asset is subsequently amortised using the straight line method from the commencement date to the earlier of the end of the useful life of the right of use asset or the end of the lease term. In addition, the right of use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

Depreciation is calculated on a straight line basis over the estimated useful lives of the right of use assets.

Lease liability

The lease is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right of use asset, or is recorded in profit or loss if the carrying amount of the right of use asset has been reduced to zero.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

3 Summary of significant accounting policies (continued)

3.21 Leases (continued)

Before adoption of IFRS 16 – applicable prior to 1 January 2019

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases are recognised in the statement of comprehensive income on a straight line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

3.22 Income tax

Current tax

Income tax comprises current and deferred tax. Income tax expense is recognised in the statement of comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax

Deferred tax is calculated using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured at the tax rates that are expected to be applied to the temporary difference when they reverse, based on the laws that have been enacted or substantially enacted at the reporting date.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are offset as there is a legally enforceable right to offset these in Oman.

3.23 Earnings per share

Basic earnings per share is calculated by dividing profit or loss attributable to ordinary equity holders of the Group by the weighted average number of ordinary shares outstanding during the year. Diluted earnings per share is calculated by adjusting the basic earnings per share for the effects of all dilutive potential ordinary shares. The Group does not have any potentially dilutive shares at the reporting date.

4 Critical accounting estimates and judgements

The preparation of financial statements in conformity with IFRS, requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

4 Critical accounting estimates and judgements (continued)

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The areas requiring a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are set out below.

4.1 Critical judgements in applying accounting policies

Classification of financial assets

Assessment of the business model within which the assets are held and assessment of whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding.

Investment in associates

Management has assessed the level of influence that the Group has on Muscat Gases Company SAOG and determined that it has significant influence, because of the board representation and contractual terms even though the shareholding is below 20%. Accordingly, this investment has been classified as an associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount (higher of value in use and fair value less costs to sell) of the associate and its carrying value, and then recognises the loss in the statement of comprehensive income.

Joint arrangement

The Group holds 50% of the voting rights of its joint arrangement. The Group has joint control over this arrangement as under the contractual agreements, unanimous consent is required from all parties to the agreements for all relevant activities.

The Group's joint arrangement is structured as a limited liability Group and provides the Group and the parties to the agreements with rights to the net assets of the limited Group under the arrangements. Therefore, this arrangement is classified as a joint venture.

4.2 Key sources of estimation uncertainty

Impairment of receivables

On 1 January 2018 IFRS 9 "Financial Instruments" replaced the 'incurred loss' impairment model in IAS 39 "Financial Instruments: Recognition and Measurement" with an 'expected credit loss' (ECL) impairment model. The new impairment model requires forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other. It also requires management to assign probability of default to various categories of receivables. Probability of default constitutes a key input in measuring an ECL and entails considerable judgement; it is an estimate of the likelihood of default over a given time horizon, the calculation of which involves historical data, assumptions and expectation of future conditions.

Useful lives of property, plant and equipment

The Group's management determines the estimated useful lives of its property, plant and equipment for calculating depreciation. The calculation of useful lives is based on management's assessment of various factors such as the operating cycles, the maintenance programs, and normal wear and tear using its best estimates.

OMAN OIL MARKETING COMPANY SAOG AND ITS SUBSIDIARIES

Notes to the consolidated financial statements For the nine months ended 30 September 2020

4 Critical accounting estimates and judgements (continued)

4.2 Key sources of estimation uncertainty (continued)

Impairment of financial assets at amortised cost

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Allowance for slow-moving and obsolete inventory

Allowance for slow-moving and obsolete inventory is based on the Management's assessment of various factors such as the usability, product life cycles, and normal wear and tear using its best estimates.

At the reporting date, net carrying value of inventory were RO 2,790,216 (2019: RO 5,485,289) and the provision for slow-moving and obsolete inventory was RO 392,167 (2019: RO 392,167). Any difference between the amounts actually released in future periods and the amounts expected to be released will be recognised in the statement of comprehensive income.

Environmental provision

Environmental provision is made for environmental remediation costs based on environmental contamination assessments made on service stations.

Provision for site restoration and abandonment cost

Provision for site restoration and abandonment cost is based on the management technical assessment of the future cost to be incurred in respect of the decommissioning of the terminal and restoration of land. The significant uncertainty in estimating the provision is the cost that will be incurred and the applicable discount rate. Based on the technical assessment carried out by management no provision has been taken for the current year.

Provisions for other costs

Included in the accrued expenses of the Group are accruals for costs which are currently under discussion with the relevant ministries, customers and a supplier in the Sultanate of Oman. These accruals are based upon the amounts due to be paid to the supplier as per the pricing mechanism communicated by the relevant party.

Taxes

Uncertainties exist with respect to the interpretation of tax regulations and the amount and timing of future taxable income. Given the wide range of business relationships and nature of existing contractual agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Group establishes provisions, based on reasonable estimates, for possible consequences of finalisation of tax assessments. The amount of such provisions is based on various factors, such as experience of previous tax assessments and differing interpretations of tax regulations by the taxable entity and the responsible tax authority.

Impairment of investment in associate

Fair value of investment in associate has been determined based on value-in-use calculations using five year projections and net asset value of the investment.

7. Investment in associates and joint venture (continued)

i) Muscat Gases Company SAOG

The Parent Company has a 9.18% (2019: 9.18%) interest in Muscat Gases Company SAOG (investee), a joint stock company incorporated in the Sultanate of Oman on 13 November 1989 under a trade license issued by the Ministry of Commerce & Industry. The investee is engaged in the manufacturing and selling of industrial and cooking gases. The Parent Company carried an impairment testing during the current year which has indicated no impairment.

The following table estimated summarised financial information of the Group's investment in the

	Group		Parent	
	2020 RO	2019 RO	2020 RO	2019 RO
Revenue	8,322,233	4,648,250	8,322,233	4,648,250
Estimated Profit for the period	498,366	193,684	498,366	193,684
Company's share in profit of the Associate estimated	45,750	17,780	45,750	17,780

ii) Lubchem International Industry LLC

Effective 6 May 2014, the Parent Company acquired a 40% shareholding in Lubchem International Industry LLC (Lubechem), a company engaged in the manufacturing of grease and lubricants, lubricants waste recycling and chemicals blending. Lubechem is registered in the Emirates of Ras Al-Khaimah as a limited liability company in Ras Al-Khaimah Investment Authority.

There are no contingent liabilities relating to the Group's interest in the above mentioned associate companies.

The following table illustrates summarised financial information of the Group's investment in the associate:
Share of the associate's estimated revenue and loss:

	Group		Parent	
	Sep, 2020 RO	Dec, 2019 RO	Sep, 2020 RO	Dec, 2019 RO
Company's Cost of Investment	216,398	387,396	216,398	387,396
Increase in Investment	8,478	-	8,478	-
Share of loss from Associate	(37,500)	(34,333)	(37,500)	(34,333)
Carrying Value of Investment in Associate	187,376	353,063	187,376	353,063
Income/(loss) from the Associate for the period	(93,750)	(85,833)	(93,750)	(85,833)
Company's share in loss of Associate	(37,500)	(34,333)	(37,500)	(34,333)

(b) Investment in joint venture

Investment in joint venture represents the Parent Company's participation in 50% of the equity interest of Omanoil Matrix Marine Services LLC (the joint venture), a company incorporated in the Sultanate of Oman on 28 April 2010. The other shareholder of the Joint Venture is Matrix Marine Holding GmbH, a company incorporated in Germany. The objective of the joint venture is to sell oil and its by-products and supply fuel at the port of Sohar.

In the year 2016, the joint venture has ceased its operations and commenced liquidation proceedings. Management has carried out an assessment and has concluded that the joint venture has sufficient assets and the carrying value of RO 69,585 will be recovered from the liquidation process.

	36,431,300	26,654,552	35,692,261	25,002,708
Less: Term deposits	(7,000,000)	(7,000,000)	(7,000,000)	(7,000,000)
Cash and cash equivalents	29,431,300	19,654,552	28,692,261	18,002,708

Cash in bank balances are with commercial banks in Oman and UAE and are denominated in Omani Rial, United Arab Emirates Dirham and US Dollars. Cash in bank include call deposits that are short term in nature and carries interest at commercial rate.

Bank balances and deposit accounts are placed with reputed financial institutions. Hence management believes that the credit risk with respect to these balances is minimal.

11. Share capital

The Group and Parent Company's authorised share capital consists of RO 15,000,000 (2019: 15,000,000).

The Group and Parent Company's issued and fully paid up share capital comprises RO 6,450,000 (2019: 6,450,000). Below is the details of shares fully issued and paid up.

	Group		Parent	
	Number of shares		Number of shares	
	Sep, 2020	Dec, 2019	Sep, 2020	Dec, 2019
3,225,000 Multi-vote shares	3,225,000	3,225,000	3,225,000	3,225,000
61,275,000 Ordinary shares	61,275,000	61,275,000	61,275,000	61,275,000
	64,500,000	64,500,000	64,500,000	64,500,000

In accordance with Article 5 of chapter two of the Parent Company's Articles of Association, the holder of each multi-vote share is entitled to two votes at the annual general meeting of the Parent Company. Multi-vote shares are considered as ordinary shares for purposes of basic and diluted earnings per share.

Shareholders of the Parent Company who own 10% or more of the Parent Company's shares, whether in their name or through a nominee account, are as follows:

	Group		Parent	
	Number of shares		Number of shares

19. Related party transactions

Related parties comprise the shareholders, directors and business entities in which they have the ability to control or exercise significant influence in financial and operating decisions.

The Company has entered into transactions with entities over which certain directors are able to exercise significant influence. In the normal course of business, the Group provides services on commercial terms to related parties and avails services from related parties. The Directors believe that the terms of providing and receiving such services are comparable with those that could be obtained from third parties.

The volumes of significant related party transactions during the year and with parties with a shareholding of 10% or more in the Group and/or related to directors, were as follows:

	Group		Parent	
	Sep, 2020 RO	Sep, 2019 RO	Sep, 2020 RO	Sep, 2019 RO
